

Jensen MFS

Multi-lane crossfolding and
stacking of small pieces

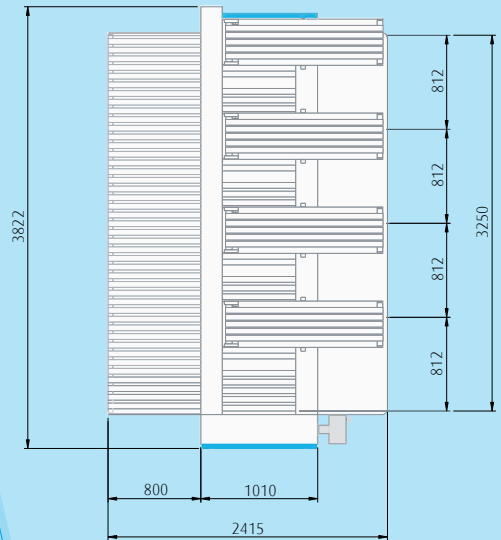

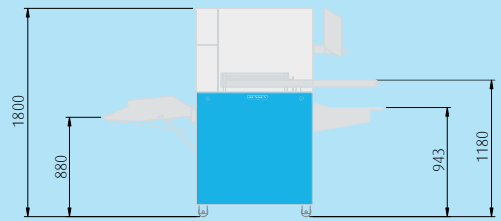

Crossfolding by the fold & stack system

Tilt tray system with conveyor (option)

Typical layout
- all measures are stated in mm

Application

The JENSEN MFS is designed as a multiline crossfolder and stacker for small pieces. The crossfolding and stacking functions are integrated. The machine operates behind multiline primary folders or combination folders. Pieces are crossfolded by the well-known fold and stack system. When the preset quantity is stacked, the conveyor automatically advances towards the rear of the machine for easy removal by a single operator.

Models & capacity

3, 4 or 5 lanes available

Working width per lane:

- Min. 600 mm
- Max. 1100 mm

Max. linen length before 1st crossfold:

- 550 mm (without tilting plates)
- 500 mm (with tilting plates)

Max. stacking height: 180 mm

Min. cycle time: 2 seconds

Features

- Jentrol MMI PCL control system and operating panel with touch screen, incl. digital counters and automatic logging of data and events
- Visual LED indicators for control of operation in PLC-rack
- Speed synchronously adjusted to ironer speed
- Full by-pass facility for individual lanes of pieces not requiring crossfolding
- Pivotal inlet conveyor giving easy access for service
- Easily adjustable

Options

- Automatic centring device
- Automatic bypass for over width
- Airblast in swing arms for light linen
- Sorting system including collection cart with two compartments
- Draping stacker
- Tilt tray system with conveyor at rear of machine for JENSEN point delivery
