

Jenstack Roll Off

High-capacity large piece stacker
for high quality purposes

Models

- Jenstack Roll Off with right or left hand delivery.

Capacity

- Max. linen size to be stacked 830 x 600 mm.
- Max. stacking height 350 mm.
- Max. capacity up to 1500 pcs/hr. depending on dimension of linen.

Application

The optimum solution for cost-efficient, high-speed stacking of folded linen. When using two Jenstack Roll Off working in tandem, linen can be sorted and stacked according to predetermined categories controlled by the folder.

Operation

The Jenstack Roll Off receives the cross folded items from any JENSEN cross folder or combination folder. The stacker works according to the well proven roll off principle combined with a liftable stacking table resulting in a first class stacking quality. As the piece enters the stacker, its leading edge is gently and accurately placed on top of the stack. As the stacking conveyor moves backwards, the stack automatically lowers as more pieces are added. The linen is stacked in a predetermined number, then ejected onto a belt conveyor.

Installation

JENSEN is pleased to assist you in planning your laundry providing excellent consulting, layouts and technical data. Authorized JENSEN distributors or JENSEN engineers should carry out the installation to ensure the correct performance.
